ICAgile Agile Business Analysis

**If you're a BA in an organization moving from waterfall to Agile,
does that mean you'll be lost with nothing to do?**

Description

We certainly don't think so. This course will show you how to combine your existing business analysis skills with Agile tools and techniques. This means you'll be better equipped to deliver value to product owners, manage all of the stakeholder wishlists and support your project team in having a shared common understanding of the product vision and features. This course leverages the Agile Extension to the Business Analysis Body of Knowledge™ and shows how the Discovery/Delivery techniques covered in the Extension can be applied effectively in agile projects.

Objectives

Using a combination of interactive presentations, problem-solving exercises, innovation learning games, and team structured simulations, the experiential workshop enables participants to:

- Understand the roles and responsibilities involved in product ownership and where the business analyst can contribute
- Understand the shape of a well--formed backlog and how to populate it progressively
- Strategies and practices for integrating the BA with Agile Software Development teams
- Five principles for agile business analysis and how they influence effective outcomes for our customers.

Topics

- The Product Owner Role
- The Value Management Team
- Product Development Lifecycle
- Product Vision
- Product Roadmap
- User Personas

- Design workshops
- Story Maps
- Backlog prioritisation
- Release planning
- Backlog refinement
- Story elaboration and splitting

Who should Attend

Anyone who works in Agile projects doing 'Business Analysis' tasks. This includes Business Analysts, Product Owners, Project Managers, Software Developers and those in Quality Assurance.

Course Includes

- ICAgile Certified Professional certification
- Class materials, resources, and references

SEUs/PDUs
Eligible 14 PMI PDUs

About the Trainer

Manjit Singh has taught Scrum, Lean and Agile practices to hundreds of students including ScrumMasters, Product Owners, team members, PMs and executive leaders who support them. He is a Certified Scrum Trainer (CST")™, ICAgile Certified Expert in Agile Coaching (ICE-AC), and ICAgile Agile Team Facilitator. Manjit holds the Certified Scrum Professional (CSP), Certified Scrum Product Owner (CSPO), and Certified ScrumMaster (CSM) certifications. He brings 17 years experience practicing Lean and Agile as a team member, Product Owner, ScrumMaster, and Coach.

About Agilious: Agilious' mission is to assist organizations in achieving the highest levels of business agility through the pragmatic application of Agile and Lean methods. As passionate practitioners, we bring over 17 years of real-world Agile and Lean experience to serve our clients in enhancing their organization's Agile DNA. We accomplish these results via ground breaking agile transformation practices, coaching, training, and agile product development.
