

Certified ScrumMaster Class

Scrum is Simple. Doing Scrum is Hard.SM

Description

Scrum was designed to enable teams to achieve a hyperproductive state (5-10 times normal performance). To achieve this level of performance, essential grounding in the Scrum work management framework is necessary.

In Scrum, there are 3 roles: the Product Owner, the Team, and the ScrumMaster. The 2-day Certified ScrumMaster class imparts the knowledge, skills, and tools to successfully implement Scrum as a ScrumMaster. This highly interactive workshop provides a foundational understanding of the Scrum framework and gives participants hands-on practice applying Scrum in multiple project settings and situations.

Objectives

Using a combination of interactive presentations, problem-solving exercises, and team structured simulations, the experiential workshop enables participants to:

- Understand the core principles, strategies, and practices of Scrum
- Practice applying Scrum in multiple project settings and situations
- Cultivate the ScrumMaster mindset vital to effectively managing projects and teams
- Gain skills and confidence in effectively communicating Scrum principles to managers and team members alike.
